

VOLUME 5

MAY 1, 2009

Our Door Shop

Inside our facility, we house our own door shop. Having a door shop on-site enables us to control assembly and gives you the ability to pick out any jamb or hinge to be installed. Do you want a door that is hung by machines on an assembly line and moved from truck to truck to truck or would you prefer to a door that was assembled by human hands and then delivered to your job site? Creative Millwork prefers the second option. By hanging our own doors one at a time we ensure the highest quality hang for our clients, and our pre-hung doors also move from our shop to our truck to your job site. Your carpenters will be able to quickly install our pre-hung doors.

Come Visit Our Location

If you have not had the opportunity to stop by our location, we would like to extend an invitation to you. We house an extensive display of some of the doors we offer, along with a beautiful display of Marvin Windows and Doors. Our expansive displays of hardware make it easy to pick out exactly what you are looking for to compliment your doors. You will find a generous amount of trim samples to look at and you will also be presented with many design ideas. Our showroom is designed and decorated with different uses of crown and moulding throughout.

We are open to the public Monday-Friday from 8am-4:30pm. We hope to see you soon!

Green
Corner**

Green Building Benefits

Building a green home brings great advantages. Not only will your home be worth more, you may also be eligible for lower insurance costs on a green home. Here are some other reasons a green home is worth building:

Energy & Water Savings * Reduced Waste * Improved Indoor Environmental Quality
* Lower Maintenance Costs * Health & Productivity Benefits
